

Physician Comments about Methylation 2018 Summit:

- *This summit will have a huge impact on my practice. I have a very full practice with many complex cases. I plan to initiate this information immediately. Thank you!*
- *This is a fantastic conference for any practitioner who wants to focus on functional medicine and learn how to provide truly individualized care. I loved the blend of genomics, hormones, nutrition, organic acids and more and how to peel back the layers and put it all together.*
- *What an outstanding seminar from a group of presenters who are not only exceptionally familiar with the complex biochemistry included in epigenetic studies but who also have a contagious enthusiasm for it making the lectures informative and interesting.*
- *It completely changes my thinking as an allergist.*
- *Attending the Methylation Summit 2018 has brought clarity to fully incorporate MTHFR support into my practice. I am now able to decode my patients and help them achieve their optimal health.*
- *This was a great conference overall! I have been struggling to acquire deeper information regarding methylation as well as practical ways to incorporate into my patient care planning. I now possess this knowledge and am amazed about how I am now thinking about clinical situations much differently after just one weekend of learning.*
- *This was an excellent conference put on by exceptional presenters. I will be back next year if they are willing to do it again.*
- *Thank you and PLEASE consider an annual US meeting!*
- *Amazing weekend. Brilliant speakers!*
