

Tri-Fortify[®]

Liposomal Glutathione

**Antioxidant Defense,
Detoxification, and
Immune System
Support***

Why should I take a glutathione supplement?

Glutathione, known as the “master antioxidant,” plays a key role in keeping your cells healthy and functioning properly by protecting them from oxidative stress and supporting the detoxification process. Oxidative stress occurs when unstable molecules (free radicals), produced from factors like poor diet, stress, pollution, alcohol, infections, and even exercise, exceed the body’s ability to neutralize them. Over time, this can lead to cellular damage, including damage to lipids, proteins, and DNA. Antioxidant protection is especially important for mitochondria, the energy-producing parts of your cells, which are highly vulnerable to free radical damage.

What makes Tri-Fortify® unique?

Superior intracellular absorption

Glutathione supplements are traditionally prone to degradation in stomach acid and poor cellular absorption. Tri-Fortify® uses an advanced liposomal delivery system that protects glutathione through digestion and enhances absorption into cells.

Heat stable

Tri-Fortify® is the only liposomal glutathione with a proven 24-month shelf life at room temperature. No refrigeration required. Our unique formula protects the glutathione from oxidation, whereas other glutathione supplements on the market are often very unstable and oxidize before use.

Delicious taste

Most glutathione supplements have a strong sulfur taste and smell. Tri-Fortify® comes in two great tasting flavors, orange and watermelon.

How does glutathione work?

Neutralizes free radicals*

Glutathione donates an electron to unstable free radicals, helping convert them into harmless molecules

Promotes detoxification*

Glutathione binds to toxins in the liver and throughout the body, preventing reabsorption and facilitating safe elimination

Supports immune function and energy production*

Glutathione helps protect and support critical cells in your body such as the mitochondria (primary energy producers), and Natural Killer cells (an important component of the immune system)

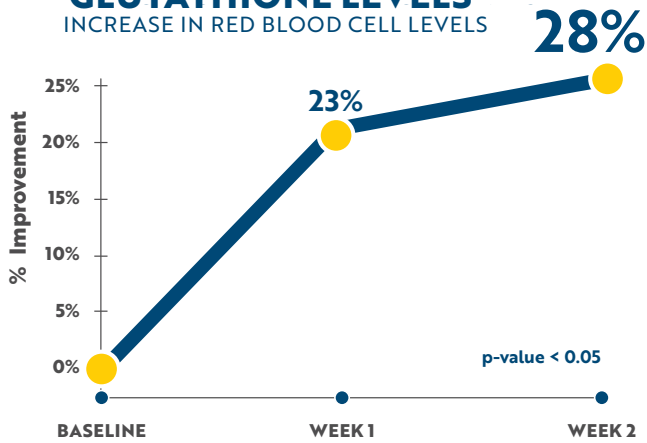

Backed by peer-reviewed published clinical research

What Can I Expect?

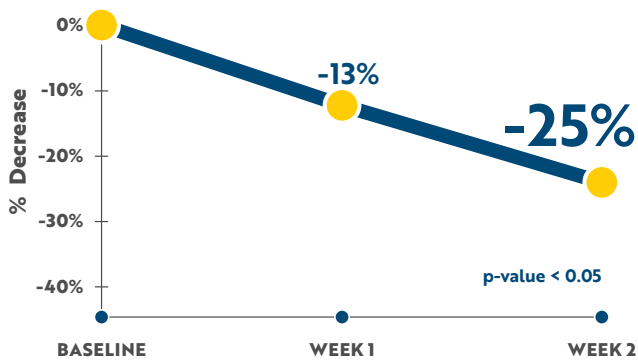

Research demonstrates significant increases in intracellular glutathione levels, reduced oxidative stress markers and significant improvement in immune function after just 2 weeks!*

GLUTATHIONE LEVELS* INCREASE IN RED BLOOD CELL LEVELS

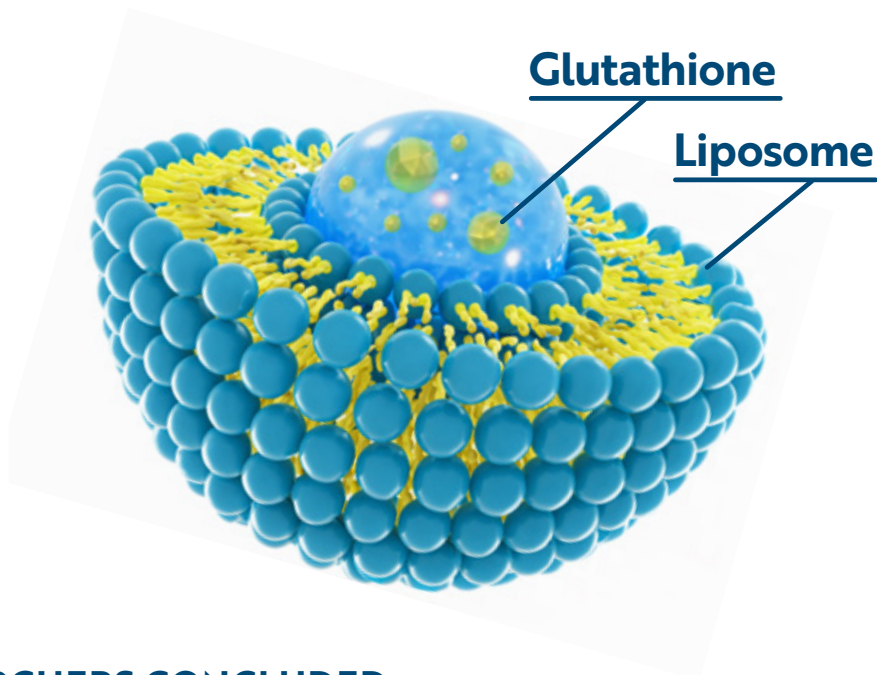

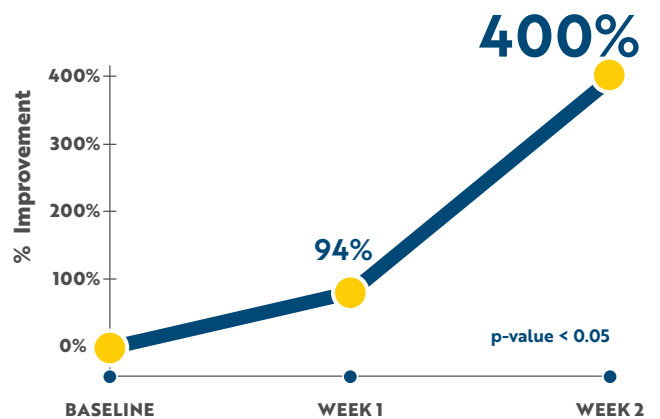

OXIDATIVE STRESS MARKERS*

LIPID PEROXIDATION
(Reduced cellular membrane oxidation)

NATURAL KILLER CELL FUNCTION*

RESEARCHERS CONCLUDED:

The glutathione increase in all blood compartments was accompanied by enhanced immune function and reduction in oxidative stress*¹

What's in Tri-Fortify®?

Tri-Fortify® contains reduced glutathione (GSH), wrapped inside of a soy derived phospholipid. This is known as a liposome, and is an advanced delivery method designed to stay intact through the digestive tract and dramatically increase intracellular absorption. Our peer-reviewed clinical study showed a 28% increase in glutathione levels in red blood cells in just 2 weeks!*

Suggested Use: As a dietary supplement, gently squeeze the tube to fill 1 teaspoon (5 mL) or open a single serving packet. Hold under tongue for 30-60 seconds and then swallow, or use as directed by your healthcare professional. Additional doses may be taken.

Supplement Facts

Serving Size: 1 teaspoon (5 mL)

Servings per Container: Approx. 48

	Amount Per Serving	% Daily ** Value
Calories	30	
Total Fat	1 g	1%
Vitamin C (Ascorbic Acid)	50 mg	56%
Reduced Glutathione	450 mg	†

** Percent Daily Value based on a 2,000 calorie diet
† Daily Value not established.

Other Ingredients: Glycerin, medium chain triglycerides, phospholipids (soy), natural flavor.

Contains: Ingredients partially derived from soy and tree nuts (coconut).

Manufactured without milk, eggs, fish, crustacean shellfish, peanuts, wheat and gluten. Produced in a facility that may process other ingredients containing these allergens.
